QMKC SERIES
COMMERCIAL BASEBOARD HEATERS

- Built-in cable clamp.
- Noise-free elements.
- Wired with 60˚C supply conductors.
- Mounts flush on any floor surface.
- Baked-on enamel finish.
- 18-gauge front cover and brackets.
- Mounting perforations in rear of cabinets.

APPLICATIONS
The QMKC with its complete line of accessories and controls, can solve the space heating needs of virtually any type of commercial structure. Individual room control allows you to heat — or not to heat — each room separately for utmost energy savings. Select exact temperatures, room by room.

FEATURES
COMMERCIAL GRADE CONSTRUCTION. 18-gauge front cover brackets allow heater to withstand rigors of commercial applications.

EASY INSTALLATION - Can be installed without disassembly, using pre-notched guide marks in rear of cabinet.

BUILT-IN WIREFAY - Facilitates end-to-end installation of continuous-run heaters.
EFFICIENT HEAT DISSIPATION - "Chimney Fin" type element designed for maximum air circulation. Air flow is directed away from walls.

STEEL SHEATHED ELEMENT - Heating element design combines the durability of a steel tubular heater with the excellent heat transfer characteristics of aluminum fins.

ROOMY JUNCTION BOX - Large, identical, pre-wired junction boxes at each end are provided with knockouts in the rear, bottom, inside and outside junction box walls. One screw allows easy access to wiring compartment.
ARCHITECT'S AND ENGINEER'S SPECIFICATIONS

Furnish and install where indicated on plans, electric baseboard heaters, suitable for continuous operation as manufactured by QMark, A Marley Engineered Products Brand, Bennettsville, SC. Heaters shall be UL listed.

ENCLOSURE: The heaters shall be fabricated of minimum .028 inch electro-galvanized steel with minimum .040 inch electro-galvanized steel control boxes. Support brackets shall be 18 ga. Junction box enclosure to have provisions for incoming and outgoing cable with cable clamp for restraining without additional hardware. Ground wire pigtail provided in each junction box for grounding.

FRONT COVER: The front cover shall be fabricated of minimum 18 gauge galvanized steel.

HEATING ELEMENT: The heating element wire shall consist of 80% nickel, 20% chromium, and shall be encaised in steel sheath to assure long and trouble free life. Aluminum fins shall be so designed as to block sheath radiation to front and back of heater body and pressure bonded to steel sheath.

INSTALLATION: Heaters shall be designed to permit use of supply conductors with 60°C insulation.

GENERAL: Linear thermal cut-out shall be factory installed to automatically shut off heater in event of overheating and reactive heater when temperatures return to normal. Raceway cover kit for providing an enclosed raceway is standard. The complete heater shall have a height of 6-3/4 (171.5) inches and a depth of 2-7/8 (73.2) inches. Heaters shall have UL approval for mounting on any floor surface including carpeting. The heater shall have a baked enamel finish.
